DETAILED ACTION

1. Claims 1-93 are presented for examination

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-75, drawn to providing a client/server file transfer system and method, classified in class 709, subclass 203.
 - II. Claims 76-93, drawn to a method for providing additional information in the form of advertisement to the client based on user preference, classified in class 705, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing a client/server file transfer system and method. Invention II allows for providing additional information in the form of advertisement to the client based on user preference. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2155

5. A telephone call was made to Steven J. Henry on August 19, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
